

Bluetooth Pairing the Entrust SC MobileLinc Credential on Your Mobile Device with Your Laptop – iOS Device

Identifying Workstation Host Name

Find your Workstation Host Name

- a. Select the **“File Explorer”** icon on your workstation and right-click on the computer icon in the left side panel of the File Explorer window
- b. Select **“Properties”** from the pull-down menu. A screen will open that contains the basic information about your computer. It will identify your computer’s name **“AITCOFxxxxxxx”** (make note for use later)

Pairing your iOS Mobile Device to the Workstation

Enable Bluetooth on your Mobile Device

- a. Click the **“Settings”** icon on your mobile device
- b. Scroll to the **“Bluetooth”** option
- c. If the Bluetooth setting is set to **“Off”** click on the Bluetooth option
- d. Toggle the Bluetooth button until it is **“Green”**
- e. Once the Bluetooth setting is set to **“On”**, click your mobile device’s **“Home”** button

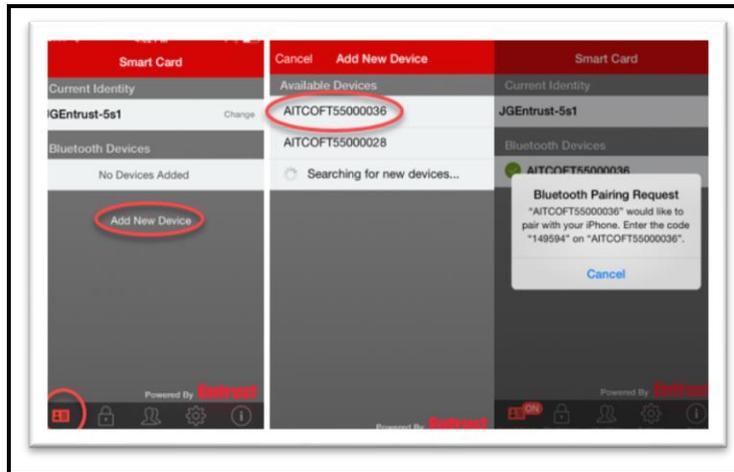

Open the Entrust SC App

- a. Select the **“Smart Card”** icon at the bottom left of the screen
- b. Select **“Add New Device”** (the app will search for devices to pair available for pairing)

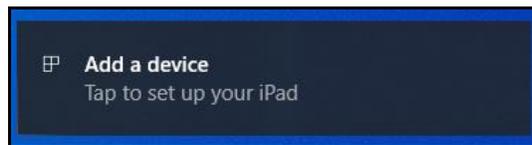

- c. Select your **“Workstation Host Name”** from the list under Available Devices

Figure 1: Pairing Availability / Workstation Host Name

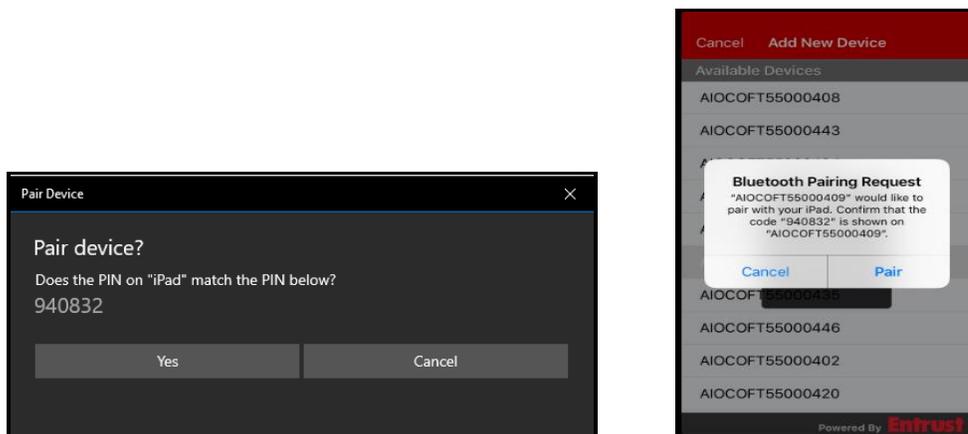

- d. Open the Add a Device alert in on the computer screen

Figure 2: Add a Device

- e. Compare the pairing code displayed on the computer with the code on the device

Figure 3: Pairing Code

For security reasons, you will have about 25 seconds to enter the activation password on keypad on your mobile device.

- f. After the pairing code is accepted, your mobile device will be paired with your workstation. Notice the **Green Checkbox**. Once paired, click “**Close**” on the workstation dialogue box

Figure 4: Device Paired with Computer

- g. You can now log into your workstation by pressing the computer name; respond “**Yes**” at the prompt
- h. To log into your workstation with the MobileLinc Credential
- Select the “**Computer Name**” under Bluetooth Devices on the Smart Card screen
 - If the computer prompts, enter the “**PIN**” you created for your Entrust SC Credential
